Summary

I have a deep-seated passion for Data Engineering, Science and Analytics in theory and practice. I am driven by ambition, curiosity, relentlessness, rigor, diligence, commitment, assertiveness, creativity and critical thinking. I believe in extensive research, networking, consultation and collaboration in stress situations and problem-solving scenarios. I am open to instruction and through experience, I have acquired the spirit of teachability and discernment.

With a strong foundation in Data Science and Analytics from Jomo Kenyatta University of Agriculture and Technology and hands-on experience learning from DataCamp, my expertise lies in data processing, gathering insights and use of those insights to make informed decisions and predictions.

My skill set encompasses Hadoop, Python (Programming Language), SQL, R and Tableau enabling me to deliver data-driven strategies that resonate with my stakeholders.

Education

Jomo Kenyatta University of Agriculture and Technology

Karen, Nairobi

Degree: BSc. Data Science and Analytics

Expected Graduation: July 2025

Relevant Coursework: Machine Learning, Database Management Systems, Probability and Statistics, Experimentation and Test of Hypotheses, Operational Research, and Project Management for Data Science.

Datacamp

Online

Certifications Exams: Certified as Data Scientist Associate and Data Analyst Associate

Graduation: Self-paced.

Relevant Coursework: Data Science with Python, Data Analysis with SQL, Data Engineering with Python and SQL.

Alliance High School

Kikuyu, Kiambu, Kenya

National Exam Grade: B+

Graduation Date: March 2021

Skills Summary

Languages: Advanced in Python, SQL and R, Intermediate in Scala, Java

Frameworks: Pandas, Numpy, Scikit-learn, Matplotlib, Tensorflow

Tools: Apache Hadoop, Tableau, dbt, Apache Spark, Apache Kafka, Apache Airflow

Platforms: Snowflake, Azure Synapse, PostgreSQL, Docker

Soft Skills: Rapport Building, Stakeholder Management, People Management, Excellent Communication

Experience

Strider

Remote

Marketing Content Developer

March 2023 – April 2024

- Crafting SEO-friendly landing pages by hiring remote developers for various roles and technologies like Python, Ruby, C++, WordPress, Data Roles, etc.
- Written 1500-word sections for 100+ landing pages, covering topics from technical interview questions to FAQs about the hiring process.
- Writing articles on the “employer blog” for founders and business owners looking to outsource talent in Latin America.
- Creating engaging and informative content that helps clients find the best talent for their projects.
- Increased the overall SEO ranking of the company's website on Google by 16%.

Elective Abroad

Nairobi, Kenya

WordPress Developer and SEO Manager

September 2023 – January 2024

- Designed and created the company website using WordPress and plugins.
- Deployed the website to production and optimized the SEO content on the website.
- I created documentation and reports that detail the development process.

Projects

Stock Prediction with Apache Spark and Apache Cassandra | [LINK](#)

March 2023

- This project aims to predict stock prices using machine learning techniques, Apache Spark, and Apache Cassandra.
- The goal is to build a data pipeline that collects stock data, preprocesses it, engineers features, and trains a machine learning model to predict future prices.

Victor Oketch Sabare

Sales Project Data Engineering Project | [LINK](#)

January 2024

- Data Engineering in Hadoop using Cloudera performing the principal tasks involved in managing, loading, extracting, and transforming data.

The GitHub History of the Scala language | [LINK](#)

January 2023

- In this project, I read in, cleaned up, and visualized the real-world project repository of Scala that spans data from a version control system (Git) and a project hosting site (GitHub).
- I find out who has had the most influence on its development and who are the experts.
- This was a comprehensive collection of historical data, commits, issues, and pull requests related to the development of Scala, a modern, multi-paradigm programming language.

Certifications

Associate Data Scientist (Datacamp) | [CERTIFICATE](#)

March 2024

- Mastered Data Management through getting data from a range of appropriate sources and resolving data issues, such as formats, handling missing data, reshaping and joining, and validating data.
- Learned programming for data science using Python, being able to write reusable code to solve data problems.
- Identifying when problems have occurred and resolved them effectively, ultimately resulting in a process suitable for production environments for solving data challenges.
- Learned about communication and visualization by presenting data in reports or dashboards to make available to stakeholders and clearly presenting actionable analytic results to business problems.
- Mastered statistical experimentation using data and relevant statistical approaches to perform experiments.
- Learned modeling by developing predictive models using appropriate machine learning techniques for the data and task at hand. Performing all elements of the model development workflow from initial fit to model validation and parameter tuning.

Associate Data Analyst (Datacamp) | [CERTIFICATE](#)

March 2024

- Mastered data management tasks such data cleaning and processing using SQL.
- Mastered exploratory analysis from specific business questions to more general exploration using Python.
- Learned about statistical experimentation by using data and relevant statistical approaches to perform experiments.
- Learned about communication and visualization as a direct line between business stakeholders and the data.

Leadership & Activities

Microsoft Learn Student Ambassador | [LINK](#)

Remote

Role

February 2022 - Current

- Encouraging my peers to use the Microsoft Learn platform and get certified by Microsoft.
- Share knowledge, foster the growth of new skills, and inspire others to explore technology-related fields.
- Running workshops to introduce and teach other students' skills in data analytics using Microsoft Technologies like Microsoft Azure.

Streamlit Student Ambassador

Remote

Role

February 2022 - Current

- Creating hackathons and events aimed at skilling my peers on Streamlit.
- Sharing the latest developments in Streamlit on social media and with my community at the University.
