Summary

Analytical and results-driven Analytics Engineering professional with a strong passion for transforming raw data into actionable insights. Equipped with 2 years of hands-on experience in technical documentation and 2 years in total data analytics, seeking to leverage my skills and expertise to drive data-centric solutions for the challenges faced by your esteemed organization. Adept at utilizing cutting-edge tools and technologies to deliver superior analytical outcomes and achieve substantial business impact.

Skills:

- Proficient in a wide range of data analysis and visualization tools, including Python, R, SQL, Power BI and Tableau, enabling efficient data processing and presentation.
- Experienced in developing predictive models and statistical analyses, using machine learning algorithms to derive meaningful patterns and trends from complex datasets.
- Skilled in designing and implementing data pipelines and ETL processes, streamlining data flow and ensuring data accuracy and integrity.
- Proven ability to collaborate cross-functionally, effectively communicating complex analytical findings to non-technical stakeholders, and influencing data-driven decision-making across the organization.

As a dedicated and innovative Analytics Engineering professional, I am excited to contribute my skills and experience to drive data excellence within your organization and facilitate strategic decision-making for sustainable growth.

Experience

Technical Writer

Strider

Mar 2023 - Present (5 months)

- Authored comprehensive and SEO-optimized content for 30+ landing pages, each spanning approximately 1500 words, focusing on hiring remote developers with expertise in diverse technologies such as PHP, Java, iOS, and more.
- Conducted thorough research to ensure the accuracy and informativeness of the content, providing readers with insights into hiring practices, technical interview questions, and frequently asked questions related to each technology.
- Significantly enhanced website visibility and organic traffic by improving SEO optimization, resulting in a 40% increase in website visits within the first quarter of content implementation.
- Received commendation from the Strider leadership team for streamlining the content creation process, reducing article delivery time by 20%, and increasing overall productivity.
- Contributed to improving user engagement and satisfaction, as evidenced by a 15% rise in average time spent on landing pages and a 25% decrease in bounce rates.

Founder and CEO at Data Odyssey

Data Odyssey

Mar 2023 - Present (5 months)

- Conceptualized and established Data Odyssey, a leading platform delivering high-quality and accessible resources on data science, analytics, and engineering.
- Assembled and lead a dynamic team of data experts and content creators, fostering a collaborative environment to produce informative and engaging content for individuals and organizations.
- Positioned Data Odyssey as a go-to source for data enthusiasts and practitioners, garnering a significant audience and making a positive impact on the data community.

Technical Writer

Medium

Jan 2023 - Present (7 months)

- Craft informative and accessible content in the domains of data engineering, data science, and data analytics, reaching a diverse audience and promoting the latest advancements and trends in the field.
- Cover a wide range of topics, including data management and storage, machine learning, artificial intelligence, data visualization, presentation, and data governance and security, staying up-to-date with industry developments to ensure accuracy and relevance.
- Collaborate closely with data engineers, data scientists, and data analysts to understand their workflows and needs, tailoring written materials to provide practical, actionable insights that empower readers to make better data-driven decisions.
- Increased the readership engagement by 30% through the creation of clear and concise content that simplifies complex data concepts for non-technical stakeholders.

Education

Jomo Kenyatta University of Agriculture and Technology

Bachelor of Science - BS, Data Science and Analytics

I am currently pursuing a Bachelor of Data Science and Analytics. So far, I have taken the following core units:

- Mathematics for Sciences
- Computer Networks
- Fundamentals of Computers and Data Science using Python
- Computer Low Level Programming for Data Science
- Calculus for Data Science
- Statistics and Probability 1
- Object Oriented Programming 1
- Algebra for Data Science
- Database Management Systems
- Modern Operating Systems
- Web Application Development

DataCamp

Data Scientist with Python Track

- Introduction to Python
- Intermediate Python
- Data Manipulation with pandas
- Joining Data with pandas

- Introduction to Statistics in Python.

Licenses & Certifications

Python Core Programming - Sololearn

20241112-1073

The Data Science Course 2021: Complete Data Science Bootcamp on Udemy -

365 Data Science

UC-55344b9a-1fdf-4822-994a-719f37bf0e93

100 Days of Code - The Complete Python Pro Bootcamp for 2021 on Udemy -

The App Brewery

UC-da791464-13fc-4f9e-b43e-98fed564a91c

Spatial Data Science: The New Frontier in Analytics MOOC - Esri

6312e9ec429ed9530cd93456

Skills

Google Analytics • Apache Kafka • Data Pipelines • Data Modeling • Data Integration • Data Engineering • Extract, Transform, Load (ETL) • Data Warehousing • MySQL • Microsoft SQL Server

Honors & Awards

Microsoft Learn Student Ambassador - Microsoft

Apr 2022

Learn Student Ambassadors are a global group of campus leaders who are eager to help fellow students, create robust tech communities and develop technical and career skills for the future.
